

Isaac Elue

Dublin, Ireland D6W E264 • +353 83 084 5787 • elueisaac14@gmail.com

SUMMARY

Computer Science and Software Engineering student with foundation in full-stack development and AI integration. Experienced in mentored projects that blend technical execution with product thinking. Skilled at translating user needs into data-driven, scalable solutions. Focused on building intuitive, high-impact products while deepening expertise in product strategy, agile development, and cross-functional collaboration.

EXPERIENCE

Associate Product Manager Intern - IBM

Starting February 2026 – Dublin, Ireland

- Selected for a 6-month internship focused on product development, user insights, and cross-functional collaboration within IBM's Cloud & AI division.

Computer Science Tutor, 10/2024 - Current

Computer Science Support Centre - Maynooth University - Maynooth

- Guided students in Java, object-oriented programming, algorithmic problem-solving, and logical reasoning within a supportive learning environment.

AI Chatbot Developer, 01/2025 - 05/2025

Microsoft x Maynooth University

- Designed and built an AI-powered chatbot using Azure OpenAI, integrating NLP and OCR to improve accessibility and user interaction.
- Defined product objectives around food tracking and safety, leading to an increase in user engagement through real-time allergen detection and six-month nutritional insights.
- Applied a product-driven approach balancing usability, scalability, and technical performance to ship a feature-complete prototype within academic timelines.

PERSONAL PROJECTS

Music management app

Stack: React, Node.js, Express, MySQL, and Axios

- Built a CRUD-based music catalog app, supporting over 5,000 records, with seamless API integration
- Crafted a responsive, accessible UI utilizing Tailwind CSS

SKILLS

- Database management (SQL)
- Java programming
- Data Analysis & Visualization
- Web development
- Linux & Operating Systems
- Algorithms and data structures
- Figma & Balsamiq

EDUCATION AND TRAINING

Bachelor of Science : Computer Science & Software Engineering, 09/2023 - 10/2027

Maynooth University - Maynooth, Kildare

GPA: 1.1

Grade Average : 78% 1st Year
67.7% 2nd Year

WEBSITES, PORTFOLIOS, PROFILES

- [linkedin.com/in/isaac-elue-122182358](https://www.linkedin.com/in/isaac-elue-122182358)
- <https://github.com/IsaacElue>

KEY COURSEWORK

- Data structures and algorithms
- Database management and SQL
- Operating systems
- Software Engineering
- UI/UX design
- Web information processing

Layoffs Data Analysis Project

Stack: MySQL, SQL, MySQL Workbench, Kaggle Dataset

- Developed a complete end-to-end SQL pipeline to clean, standardize, and analyze global layoff data.
- Built staging tables and applied advanced SQL techniques to uncover insights into layoffs by company, industry, and year.
- Delivered a structured workflow from raw data to exploratory analysis, highlighting patterns in economic and startup layoffs.
- Strengthened data storytelling and analytical rigor applicable to product and business decision-making.

Electric Vehicle Data Analytics Dashboard – 2025

Stack: MySQL, Power BI, Excel (Power Query)

- Built an end-to-end data analytics workflow analyzing 475 global EV models to surface performance and market insights.
- Cleaned and standardized raw datasets, performed SQL-based EDA to uncover relationships between battery capacity, range, and drivetrain efficiency, and developed an interactive Power BI dashboard for business stakeholders.
- Delivered KPIs and visuals highlighting brand dominance, efficiency trends, and customer-focused EV recommendations.
- Strengthened analytical storytelling, SQL query design, and dashboard presentation for data-driven product and market decisions.
